ATAC SAF Hire & Purchase

ATAC SAF is available for **Capital Purchase** or **Hire** markets and can be supplied with all the required ancillary equipment such as walkways, pumps, hoses, remote monitoring etc.

Capital Schemes

↪ The ATAC SAF Wastewater treatment plant has been designed and built to provide the highest treatment potential whilst using the lowest power – placing ATAC SAF at the forefront of the SAF marketplace.

↪ ATAC SAF utilises fixed film PVC media - this is used with differing specific surface areas depending on application/loading rates and gives our SAF plant a very small footprint. This structured corrugated media is robust, has a long lifespan and is not susceptible to clogging.

Hire Systems

↪ ATAC SAF is “Plug & Play” leaving our Kent factory fully commissioned and tested, just requiring a site electrical supply and inlet/outlet connections. Site installation and commissioning can be completed in less than 2 hours!
