

# ATAC Solutions Service & Maintenance Division

ATAC Solutions Ltd provides service and maintenance to a vast array of customers nationwide. Whether you are a domestic customer with a small treatment system or pumping station or a large industrial or commercial client with a village treatment works, ATAC can service and maintain your water and wastewater equipment.

All waste water equipment requires servicing to minimise the risk of failures and environmental contamination. One of the easiest ways to protect yourself against this is to appoint an approved service provider. Our engineers will look after the equipment and ensure it is serviced according to the appropriate regulations and standards.

We will ensure continuous efficient treatment and environmentally clean and legal discharges. Our onsite operations teams are fully certified to the current CDM and confined space regulations. Our servicing and maintenance solutions include –

- ✓ Wastewater treatment systems
- ✓ Pumping stations
- ✓ Oil interceptors
- ✓ GSM monitoring
- ✓ Full plant refurbishment
- ✓ Flow screen refurbishment and replacement
- ✓ Rainwater Harvesting
- ✓ Booster Sets
- ✓ New Installations

\* We can service systems commissioned by all manufacturers including Klargest, Kee, Titan, WPL, Conder etc.

Nationwide coverage and 24/7 call out & emergency service 365 days a year

The environment agency requires that your treatment plant is being regularly serviced and maintained. We provide you with all service documentation as proof that you are compliant with this statutory requirement.

To discuss your requirements further and to arrange a no obligation visit please contact us on 01622 882400 or email [info@atacsolutions.com](mailto:info@atacsolutions.com)
