

AUTOMATIC MESH FILTER

Filtration From 50µm to 5mm

MAINS APPLICATIONS

- Potable water filtration before chemical treatment,
- Protection of pump stations,
- Protection of hydraulic stations,
- Protection for entry and exit of fishfarm,
- Filtration in exit of industrial process.

ACCESSORIES

- Lifting system for maintenance position,
- Screw conveyors,
- Hydraulic or screw compactation,
- Chute or BIG BAG removing reception,
- Pump alimentation of cleaning ramp.

MAINS CHARACTERISTICS

- Stainless steel construction,
- Simple and strong construction,
- Reduced maintenance,
- Quick and easy installation,
- Continu working,
- Reduced electric consumption,
- Mechanical motor limitation,
- Construction on demand (inclined or vertical)
- Filtration from level 0,
- Reinforced mesh for thin filtrations,
- Cleaning ramp system for the mesh.
