Drainage Pumps/Waste Water Pumps

Ama-Porter

Main applications

- Drainage systems
- Water extraction
- Drainage

Fluids handled

- Grey water
- Waste water containing long fibres and solid substances
- Gas-containing fluids

SE	Single-phase AC motor with float switch
NE	Single-phase AC motor without float switch
ND	Three-phase asynchronous motor without float switch

Design details

Design

- Fully floodable submersible motor pump
- Close-coupled design
- Vertical installation
- Single-stage

Installation types

- Wet-installed stationary pump sets
- Wet-installed transportable pump sets

Shaft seal

Drive end

- Shaft seal ring

Pump end

- 1 bi-directional mechanical seal with liquid reservoir

Impeller type

	Free-flow impeller (impeller type F)	Suitable for the following fluids: fluids containing solids and stringy material as well as fluids with entrapped air or gas
---	--------------------------------------	--

	Impeller with cutter (impeller type S)	Suitable for the following fluids: faeces, domestic sewage and waste water containing long fibres
---	--	---

Drive

- Single-phase AC motor
 - 50 Hz: 230 V
 - With integrated temperature switch
- Three-phase asynchronous motor
 - 50 Hz: 400 V
 - DOL starting
- Enclosure: IP68 (permanently submerged) to EN 60529 / IEC 529
- Thermal class of winding insulation: F

Bearings

- Grease-lubricated bearings sealed for life

1) Blank

Coating and preservation

Primer and top coat

Surface treatment:	Blasted to SA 2 1/2 to DIN EN ISO 12944
Top coat:	Two-component high-solid epoxy resin finish (RAL 5002), min. layer thickness = 75 µm

Special coating

Available on request (extra charge and a longer delivery period apply).

Product benefits

- Easy and fast installation/removal with polarised, absolutely watertight cable and KSB plug connection ensuring correct installation

- Motor absolutely watertight, also in the event of damage to the cable sheath and core insulation, with individually stripped, tinned and resin-sealed conductors
- High operating reliability due to dry, pressure-tight and encapsulated squirrel-cage motor, thermal class F
- Three-phase motor: protected against overheating even under tough operating conditions due to generously sized motor.
- AC motor: protected against overheating by thermal switches in the windings
- Long service life with shaft made of corrosion-resistant stainless steel
- Increased reliability due to bi-directional mechanical seal
- Ease of service with wetted bolts made of stainless steel, which are easy to undo even after years of operation
- Trouble-free operation: clogging by coarse particles is prevented by large free passage (free-flow impeller) or by cutter with high mechanical resistance for waste water
- Stationary pump sets easy to install and remove with automatic, bolt-free connection; leakage prevented by elastic sealing elements

Certifications

Scope of supply

Depending on the model, the following items are included in the scope of supply:

Stationary wet-installed model (installation type S)

- Pump set, complete with power cable
- Claw with sealing element (O-ring) and mounting elements
- Lifting chain⁴⁾
- Mounting bracket with mounting elements

- Duckfoot bend with mounting elements
- Guiding accessories
(guide rails are not included in KSB's scope of supply)

Transportable wet-installed model (installation type P)

- Pump set, complete with power cable
- Installation parts for transportable version, comprising:
three feet, connection elbow, connection piece and clamp
- Lifting chain⁵⁾
